# AprilAire®

Dehumidifier Wi-Fi
Connect to Home Network and Cloud

CONNECT ON THE CONTROL

POWER ON THE CONTROL

When the control is powered, you should see the Bluetooth symbol, in the top left part of the display.
NOTE: Bluetooth will be ON for one hour at the time of power up, and then it will turn off. If the Bluetooth symbol isn't showing, the following ways are available to restart Bluetooth.
RESTART BLUETOOTH

If the Bluetooth symbol isn't showing, choose one of the following two methods to restart the dehumidifier's Bluetooth connection.
1. Cycle power to the dehumidifier unit.

2. Manually restart Bluetooth through the Menu.

   a. Navigate to the **MENU**, and select.

   b. Navigate to **Bluetooth**, and select.

   c. Navigate to **Pairing Mode**, and toggle **On**.

3. Continue to the App.

CONNECT ON THE APP

DOWNLOAD THE APP

Search and install the **AprilAire Healthy Air App** and create an account.*

GET IT ON Google Play

Download on the App Store

CONNECT TO WI-FI

1. Add the product by selecting **+** icon or **Add a Product** button.

2. Select **Dehumidifiers** and then select the Wi-Fi dehumidifier option (e.g., "E070W").

3. When **AprilAire Dehum** is available on the **Pair Device** page, select **Connect**. To complete the Bluetooth connection, follow the phones pairing prompts.

4. **NOTE:** If no devices are found or pairing is unsuccessful, follow troubleshooting given on the app.

5. Find and select the Wi-Fi network to connect to.

6. Enter in the Wi-Fi network's password, and select **Connect**.

7. Wait for success!

NOTE: If a provisioning incomplete display is shown, try again and take note.

If a red **Failed to...** page displays, this indicates that something went wrong with trying to connect. See **TABLE 1**.
TABLE 1: TROUBLESHOOTING

| Failure to connect to Wi-Fi network	Failure to connect to AprilAire account	Failure to connect to AprilAire cloud
This page will prompt the failure. For example, it will inform if the password for the Wi-Fi network was the failure.	This failure may indicate that the account isn't fully setup (finishing the setup will resolve the failure) or the control is already connected to an AprilAire account (Referencing the Wi-Fi Dehumidifier IOM follow the process to unregister the control on the UI will resolve this failure).	This failure may indicate that the control is already connected to an AprilAire account (This failure may indicate that the account isn't fully setup (finishing the setup will resolve the failure) or the control is already connected to an AprilAire account (At the control, unregistering the control will resolve this failure).

*Not all previous versions of Android or iOS are supported.
1. Navigate and select **MENU**.

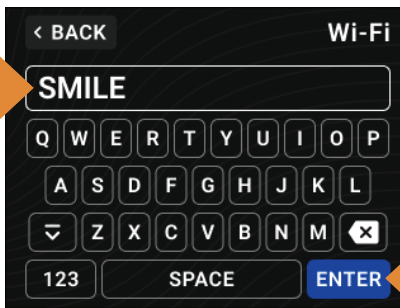

2. Navigate and select **Wi-Fi**.

3. Navigate and select **Connect Wi-Fi**.

4. Navigate and select the Wi-Fi network to connect to.

5. Enter Wi-Fi network password and select **ENTER** when ready.

6. Enter the IP Settings **DHCP** or **Static**.

7. Review the network information and scroll to the bottom and select **Connect**.

8. The control will verify Wi-Fi network connection and cloud connection and revert back to the **Wi-Fi** menu when complete.

The Dehumidifier control is now connected to Wi-Fi. Follow the remaining steps, to associate the Wi-Fi Dehumidifier to the AprilAire account.
9. Navigate and select **MENU**.

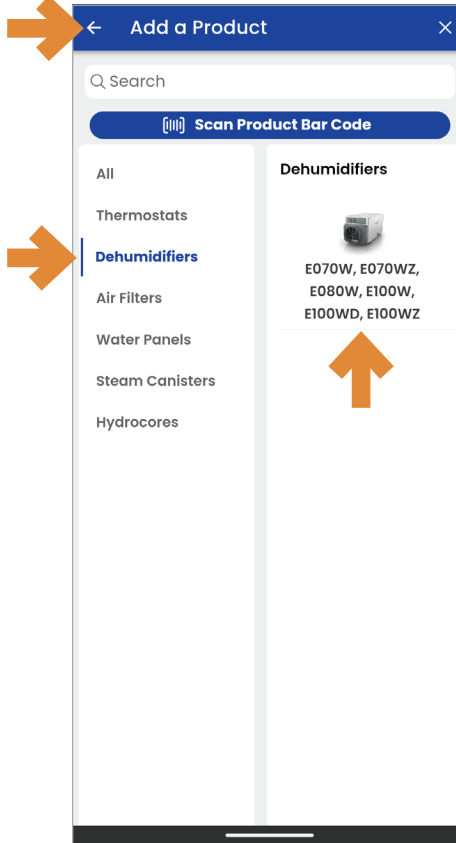

10. Navigate and select **Wi-Fi**.

11. Navigate and select **Wi-Fi Details**.

12. Scroll down until the MAC Address is visible. Record the MAC Address. MAC Address will be 12 characters (ex., XX XX XX XX XX XX).
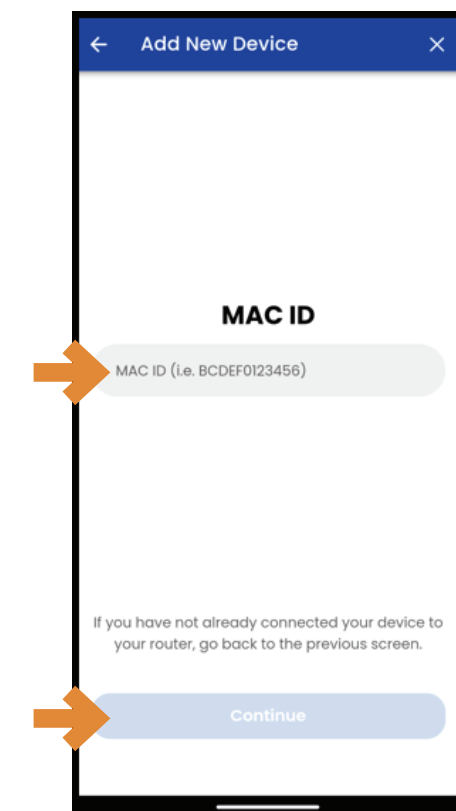

13. Open the App and tap **Add A Product** text. Select **Dehumidifiers** and then select a dehumidifier option (i.e. "E070W).

14. Select **OTHER OPTIONS**.

15. Enter the MAC Address (without colons) recorded in step 12 and press **Continue**.

16. Wait for success!
