

Wi-Fi Enabled Dehumidifier

Connected IAQ solution for better control

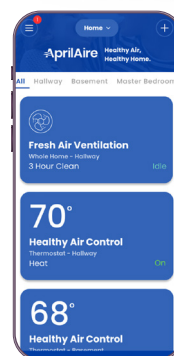

NEW!

Market Insights:

- Dehumidifiers are commonly located in difficult to access areas
- Wi-Fi dehumidifiers previously introduced failed to maintain a consistent Internet connection
- Contractors and consumers are asking for reliable ways to assess dehumidifier performance and monitor conditions within the home

Why Choose the AprilAire Wi-Fi Dehumidifier

- Reliable connectivity and monitoring
- Ease of installation: ~3 minute setup/pairing
- Maintenance and error code alerts
- Enhanced product support
- Ability to sell professional monitoring as part of a service contract
- Proactively monitor performance from anywhere
- Best-in-class user experience to solve moisture and high humidity

Works with
the AprilAire
Healthy Air App

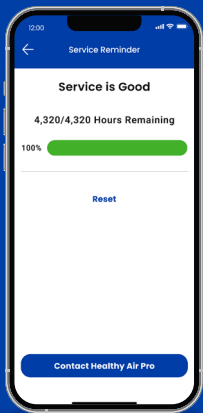

Features
